

Uncover the new, extra-deep premium tyre
for loaders and dozers.

NEW

VSDR: V-STEEL SUPER DEEP ROCK

VSDR: V-STEEL SUPER DEEP ROCK

When the going gets tough, the toughest dozers and loaders get the proven strength and reliability of the Bridgestone VSDR tyre. The V-Steel Super Deep Rock off-the-road radial tyre offers extra-deep (L5) tread for even the most extreme operations. Its high-volume, long-life tread and superior construction provide outstanding cut resistance and longer tyre life than ever before. The net result? The VSDR is now the no. 1 tyre for working in harsh conditions such as recycling, mining and quarrying.

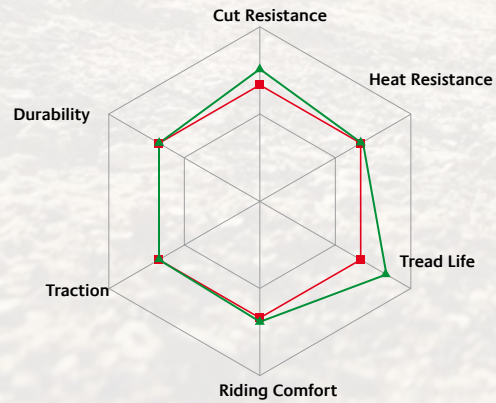

VSDR vs. VSDL

As this graph clearly demonstrates, the VSDR combines the same, superior levels of grip, riding comfort and durability as its predecessor.

Compared to the VSDL, the VSDR has significant improvement in:

- cut resistance and tyre life.
- cost per hour, guaranteeing premium performance for both your heavy-duty machinery and your business.

OUTSTANDING PERFORMANCE

VSDR

Superior Cut Resistance

The VSDR's precision-engineered, multi-ply steel belts and unique profile reinforce the side walls of the tyre, minimising the risk of cuts and tears.

Longer Tread Life

Higher tread volume and reinforced tread blocks enable VSDR to operate even longer than VSDL.
