

Raising the bar for all-terrain-crane tyre life

NEW VHS2: V-STEEL HIGHWAY SERVICE 2

VHS2: V-STEEL HIGHWAY SERVICE 2

Bridgestone's newest addition to their range of premium Off-the-road crane tyres is built to deliver longest lasting heavy-duty performance. Combining outstanding durability and long wear life with excellent on-road performance, this advanced all-terrain crane tyre has all the ingredients to lift both your payload and your business to new heights.

VHS vs. VHS2

Like its predecessor, the VHS, the Bridgestone VHS2 crane tyre is engineered to perform over a wide variety of surface conditions: from road to rough terrain, combining outstanding traction and high-speed stability with light-weight and low-noise operation.

As the adjacent chart indicates, the VHS2 raises the bar yet further, delivering upwards of 10% longer tread life and equivalent improvements in terms of resistance to irregular wear. For premium performance you can rely on, for even longer than ever before.

— VHS2 — VHS

OUTSTANDING PERFORMANCE

High resistance to irregular wear

The VHS2's optimised casing design guarantees a uniform distribution of contact pressure, even under heavy loads and on uneven terrain. The result is greater resistance to irregular wear of up to 10% which can make all the difference to your bottom line!

Long wear life

The VHS2's advanced materials engineering and tread-design deliver clear improvements in tread life, even under challenging conditions. For longer-lasting performance, less down time and a better return on your tyre investment. The symmetrical tread pattern of VHS2 allows full flexibility in terms of axle & position placement allowing end-user to maximise total wear potential.

Low-noise performance

When back on the road, you can count on a smooth and comfortable ride thanks to the VHS2's closed shoulder design and variable pattern pitch which help reduce tyre noise.

Light-weight construction

Using the most advanced construction techniques developed in-house by Bridgestone, the VHS2 succeeds in combining premium on and off-road performance in a light-weight package. For highly efficient operations, whatever the job, wherever the location.

AVAILABLE TYRE SIZES

Size	Load Index / Speed Symbol	Type	Rim size	Approximate Inflated Dimensions								OTD mm
				OD		OW		SLR		SLW		
				mm	inch	mm	inch	mm	inch	mm	inch	
445/95R25	174F	T/L*	11.25/2.0 11.00/1.7CR	1484	58.4	435	17.1	684	26.9	480	18.9	25.5**

* Note: T/L: Tubeless type

** VHS2 retains the ability to be regrooved in later stages of wear to extend total life even further.
