Bridgestone On/Off tyres deliver outstanding durability and performance, even in harsh, off-road conditions. From rugged terrain to mining and construction sites, Bridgestone’s premium technology guarantees excellent resistance to cutting and chipping for long-lasting performance. And with the new range (EVO marked), they can operate at higher payloads for even greater efficiency.

**NEW ADDITIONAL LOAD CAPACITY**

**NEW ON/OFF RANGE**

The new on/off EVO range offers additional load capacity thanks to a reinforced bead structure and highly advanced technologies such as Waved Belt™**, which increases the stability and durability of the casing. Operators can now maximize the use of heavy on/off vehicles during harsh operations without the need of switch to bigger rims (24”).

The structure of the new EVO range has been reinforced to make it robust enough to maintain the skeleton of the tyre avoiding deformation in service while keeping the flexibility required in on/off operations.

For example a 8x4 truck fitted with the new tyres allows for a gross vehicle weight of 49 ton¹.

¹ Technical capabilities of vehicle and other components must also be appropriate to this capacity.

**WINTER PERFORMANCE**

The new on/off tyres are suitable for use on mud and fresh or melting snow (M+S), offering better driving performance than standard tyres. They are also marked with the alpine symbol, identifying snow tyres as defined in UN Regulation R117.02. This allows for excellent grip and braking performance all year round.

**EXTEND THE LIFE OF YOUR TYRES**

Your tyres are a major investment. Which is why Bridgestone helps you maximise your returns by minimising your cost per km, over the entire lifecycle of your tyres: this is Total Tyre Life!

The Split belt package*, which softens the belt package allowing more casing flexion, as well as the Stone Ejector**, which avoid stones from penetrating to the belts, are two Bridgestone’s on/off features which improve the tyre’s resistance and increase the casing’s value and retreadability.

**AVAILABLE TYRE SIZES**
